Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-4, drawn to an *ex vivo* gene delivery method of employing genetically modified cells comprising an exogenous AAV Rep protein and a genetic construct comprising AAV LTRs operably linked to a gene of interest for delivery to a mammal, classifiable in Class 424, subclass 93.21.

Group II. Claims 5-6, drawn to an *in vivo* gene therapy method of employing a combination of an exogenous AAV Rep protein or a genetic construct expressing an AAV Rep protein, and a genetic construct comprising AAV LTRs operably linked to a gene of interest for delivery to a mammal, classifiable in Class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are distinct because the method of each respective group is directed to distinct goal, materially distinct steps, and generates distinct functions and effects. An administration to a mammal of genetically modified cells containing both AAV Rep and AAV LTRs operably linked to a gene of interest is not the same as the claimed invention of Group II, wherein *in vivo* administration of multiple distinct components is required to achieved an intended effect.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, fall into different statutory classes of invention, and are separately classified and searched, and/or because of the patentably distinct species as listed above (the listed species, as evidenced by each of the respective and art recognized named molecule, are

Serial Number: 09/922,327

Art Unit: 1632

structurally distinct), it would be unduly burdensome for the examiner to search and examine all of the subject matter being sought in the presently pending claims, and thus, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Any inquiry concerning this communication or earlier communications regarding the formalities should be directed to Patent Analyst Tiffany Tabb, whose telephone number is (703) 605-1238.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Dave Nguyen* whose telephone number is (703) 305-2024.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Deborah Reynolds*, may be reached at (703) 305-4051.

Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center number is (703) 305-7401.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
